* What is an Ontological Symbolism? In short words it is improved surrealism, more mild with removed its psychic automatism or other components influenced by freudism but still opened for interpretation.

Ontological Symbolism – the art movement I invented in 2018 to make a realism “ontological”, less -ism an more real with distinguishable symbols of independent existence.

X Not for sale

My first and most important artwork in OS style, 'no name' (painted in 2016 and comprehended within two years).

** Pick up an executed picture from my place in Brooklyn, NYC: I do not deliver. Please make full payment by PayPal, no deposit. I'll finish a painting during 2 weeks. Keep in mind I do not paint a copies for resale to somebody else after an actual selling of that exact artwork so it stays unique. An execution of original painting on canvas may looks slightly different because I show here just a digital representation of it.
